ANAND KUMAR

Backend & System Software Engineer

+91-9289015062 • anandkumar001k@gmail.com • linkedin.com/in/4n4ndd • github.com/4n4ndd

PROFESSIONAL SUMMARY

Backend & System Software Engineer with experience building distributed systems, API gateways, and scalable backend architectures using Java, Spring Boot, and Microservices. Skilled in authentication, caching, fault tolerance, and low-latency systems with strong foundations in DSA, System Design, Operating Systems, and Computer Networks.

EDUCATION

Galgotias University, Greater Noida, Uttar Pradesh *Oct 2023 – June 2026*

Bachelor of Computer Applications | CGPA: 8.29

WORK EXPERIENCE

Web Development Intern — Xstream Secure *Nov 2025 – Jan 2026*

- Contributed to the development of a **background verification system** using React.js & Spring Boot.
- Developed **dynamic frontend components** and backend logic using **REST APIs and CRUD operations**.
- Worked with **MySQL databases** following **MVC architecture** and maintained version control using **Git**.
- Collaborated in a **remote agile environment** and gained hands-on **full-stack development experience**.

PROJECTS

URL Shortener & Analytics Platform

Java, Spring Boot, MongoDB, Redis, Docker

- Built a production-grade URL shortening platform supporting URL creation, redirection, expiration, and QR code generation.
- Implemented Redis caching and rate limiting to improve redirect performance and protect APIs from excessive requests.
- Designed collision-safe short-code generation with MongoDB unique indexing and efficient URL lookup.
- Added click analytics, centralized exception handling, input validation, automated testing, Docker deployment, and application monitoring.

Distributed Video Delivery & Processing Platform

Spring Boot, Kafka, Redis, AWS S3, FFmpeg, HLS, Docker

- Developed a **Spring Boot microservices platform** for video upload, processing, encoding, and streaming.
- Built a **Kafka-based event pipeline** for asynchronous FFmpeg video transcoding into multiple resolutions.
- Implemented **HLS adaptive streaming** with AWS S3 for efficient and scalable video delivery.
- Integrated **Redis caching and Docker** to improve metadata access and streamline service deployment.

WorkWave – Full Stack Job Portal

Spring Boot, React.js, MySQL, Redis, OAuth2

- Built a **scalable job portal platform** for recruiters and applicants.
- Implemented **secure authentication** and role-based access control.
- Developed **REST APIs** for job postings, applications, and user management.
- Added advanced **search, filtering, and job recommendation** features.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Html, CSS

Backend: Spring Boot, Spring Security, Microservices, REST APIs, Web Sockets, Microservices, Kafka, RabbitMQ

Frontend: React, Vite, Bootstrap

System Design: High-Level Design (HLD), Low-Level Design (LLD), Design Patterns, Distributed Systems, Caching, Scalability

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools: Docker, Git/GitHub, Postman, MS Word, MS Excel

Core: DSA, OOP, DBMS, OS, CN, System Design
